Dear HENRY FEESER:

PA case: 77130503

Express Scripts, Inc. administers the TRICARE Pharmacy Program (TPharm).

Your physician recently requested approval to cover Freestyle Libre 3 Sensor Each. After reviewing the information provided it has been determined that the request cannot be approved. Coverage is provided in situations where the requested product is prescribed by an endocrinologist or diabetes management expert. Diabetes management expert is defined as: licensed independent practitioner experienced in the management of insulin dependent diabetics requiring basal and bolus dosing or a pump and familiar with the operation and reports necessary for proper management of continuous glucose monitoring systems. This is a self-certification. Coverage cannot be authorized at this time. Other coverage conditions may apply. -Medical devices, including CGM Medical Devices and Supplies, are primarily covered by the TRICARE Health Plan and any additions to the pharmacy benefit are not meant to replace this pathway for procuring medical devices. Patients have the option to seek coverage through the TRICARE Health Plan. Information on their specific regional TRICARE Health Plan contractors can be found here: <https://www.tricare.mil/About/Partners>. Please refer to the section below entitled "Your Appeal Rights" for information regarding how you may request a reconsideration of this denial.

You and your doctor may obtain more information on coverage rules and requirements by going to <https://www.express-scripts.com/frontend/open-enrollment/tricare/fst/#/> or by calling the TRICARE Pharmacy Program at 1-877-363-1303.
